CEO posing for a picture (third standing from left with clients after consultation meeting.

Engineering Services

We also provide engineering and design services in the disciplines of mechanical and electrical building systems. We are experts in plumbing, fire protection, wall construction, vehicles repair and maintenance. We have the capabilities to provide complete engineering, design and support services for any size of a project from concept through construction. under the Engineering, Procurement and Construction (EPC) based arrangement.

Conflict Resolution

We have experts who normally provide solutions to the logistic problems. Client and investors have many different perspectives on the nature of the value we provide. Some quantify the benefits in financial terms, while others focus on the knowledge and experience of our people, functional and geographic resources to solve problems or the quality of our advice and ideas. Then there are those who cite the strength of our global network, our objectivity and intergrity or our ability to make their lives simpler.

Customs Clearance

- As an expert in international logistics, we support smooth customs clearance.
- Provide support in accurate and prompt import and export procedures such as reviewing shipping documents.
- Assist in matters related to customs valuation, Generalized System of Preferences, EPA System of Preferences, and tax relief, etc.

Experience in customs clearance

Provide reliable support for tiresome customs procedures which require specialized knowledge, including legal elements.

- Wealth of experience over the years handling shipping for corporate clients in various industries.
- Leverage our large number of customs agents with specialized knowledge and experience to ensure reliable and prompt customs declaration.

Extensive customs clearance services

Offer timely support tailored to our customers' needs.

- We stand ready to handle customs procedures for either air or ocean cargo so as to comply with the customer's logistics strategy.
- Able to handle customs clearance procedures of any number of goods including perishables, food, sundries, chemicals, textiles, semiconductors, and aircraft parts.
- Implement customs clearance in a speedy manner using the NACCS system (Electronic information communication system connecting the customs office, carrier, customs broker, warehouse company, and financial institution).

Proper declaration

Offer a safe and secure declaration system while compliance is observed.

- We make prior confirmation of customs law-related matters to ensure goods prohibited from import and export are not included.
- We also confirm in advance whether there are no problems with filing declarations in compliance with applicable laws other than the Customs Act, such as the Export Trade Control Order, Food Sanitation Law, Drugs, Cosmetics and Medical Instruments Act, and Act on Quarantine for Imported and Exported Plants, etc.
